

## Fees Associated with Background Screening

FEBRUARY 2024

## Background Screening Fees

Information sources, such as national organizations and government agencies, attach fees associated with the background screening process to help offset the costs required to produce, organize and protect information. This document contains pricing and some background information related to how USA SmartHire, USATenant, and LendFACT incorporate these costs.

### State Fees Summary

State government entities attach fees associated with the background screening process to help offset their own internal costs. A chart detailing how the fee structure works for each entity is shown on pages 11 and 12. Fees contained on this list are subject to change **at any time and without notice**.

#### I. DMV State Fees

Each state's DMV charges an access fee per Motor Vehicle Report (MVR). There are state-approved providers that must be used to access the state's system, which adds a small additional fee per report retrieved. The state and provider's fees are combined as a third-party fee listed on pages 10-11, which are additional to the charges from our services.

#### II. County Criminal State Fees

Many County Courts across the U.S. charge a fee for record research and/or to provide case files for review. These fees help offset their own internal costs. A chart detailing how the fee structure works for each entity is shown on pages 6 -10. Fees contained on this list are subject to change at any time and without notice.

#### III. Worker's Compensation State Fees

Some states charge an access fee for workers' compensation records. The fees listed in the table on page 11 are additional to our service charges.

## Verification Service Fees

### Database Agencies for Employment Verifications

Employment verifications are processed via a call center where trained telephone operators call employers requesting verification of information provided on an application in addition to requesting reference information about the work habits of the applicant. The evolution of background screening produced a market for employment record databases to be stored and used to verify employment. Agencies such as The Work Number created the business model of accepting employment verification requests from large companies who did not want the burden of receiving these requests. Verification agencies receive large numbers of employment records from their clients (employers) and use that information to create large databases of employment records charging access fees to background companies.

These fees range from \$5 to \$109, with a standard Work Number search costing \$109 per candidate, and are in addition to our service charge for employment verification information. On very rare occasions, there are employers that charge fees for obtaining prior employment information to help cover the cost of the verification. These fees are also in addition to our service charge for employment verification information.

### Database Agencies for Education Verifications

The verification of degrees, certificates, etc. are primarily accomplished directly through the educational institution via a call center and trained telephone operators. However, very similar to the trend for employment verifications, many of the nation's universities and colleges began employing agencies to create and maintain databases of current and former students. The institutions utilizing services such as The National Student Clearinghouse (NSC) require background screening companies to process verifications through the agency. Degree verification fees from these agencies average between \$5 and \$20 (NSC is \$17.50) in addition to our service fee to

obtain the information. There are occasions when educational institutions will charge fees to access educational information from their own databases. These fees as well as those for transcripts and degree copies are also an additional charge.

### Language Line Services

The Language Line Service is utilized to perform international verifications, when necessary. Expenses for these services range from \$10 to \$80, depending on the length of the call and the country being called.

### Summary

Our pricing reflects the cost of the services we provide to our clients. Governmental and outside agency fees associated with obtaining background information across the country such as state DMV fees, county clerk retrieval fees, and verification services are billed in addition to our service charges. These fees are very inconsistent and it would not be practical to continuously adjust our pricing to accommodate the changes and regional considerations for these fees.

We publish this fee schedule because it has been our experience that it helps our clients manage their budget better when they know that all counties, states, universities, and employers are not uniform in their fee structure for retrieving background information.
